OVERVIEW

ElegantJBeans is a collection of JavaBeans™ Components developed for Java professionals. Development platform is not a constraint for ElegantJBeans. You can use ElegantJBeans component with J2SE, J2EE, JAVA applications and JAVA applets. ElegantJBeans can be imported in all major IDEs - to use it visually as well as through coding.

Dynamic Printing made simple, fast, easy and the most flexible

ElegantJ Printer JavaBeans™ is implementation of Java™ printing and provides full printing functionality, including printing of any component, controlling spool size, background printing, configurable header and footer, preview and page setup. ElegantJ Printer component works with any Java™ component that does not have native support for printing.

Salient FEATURES

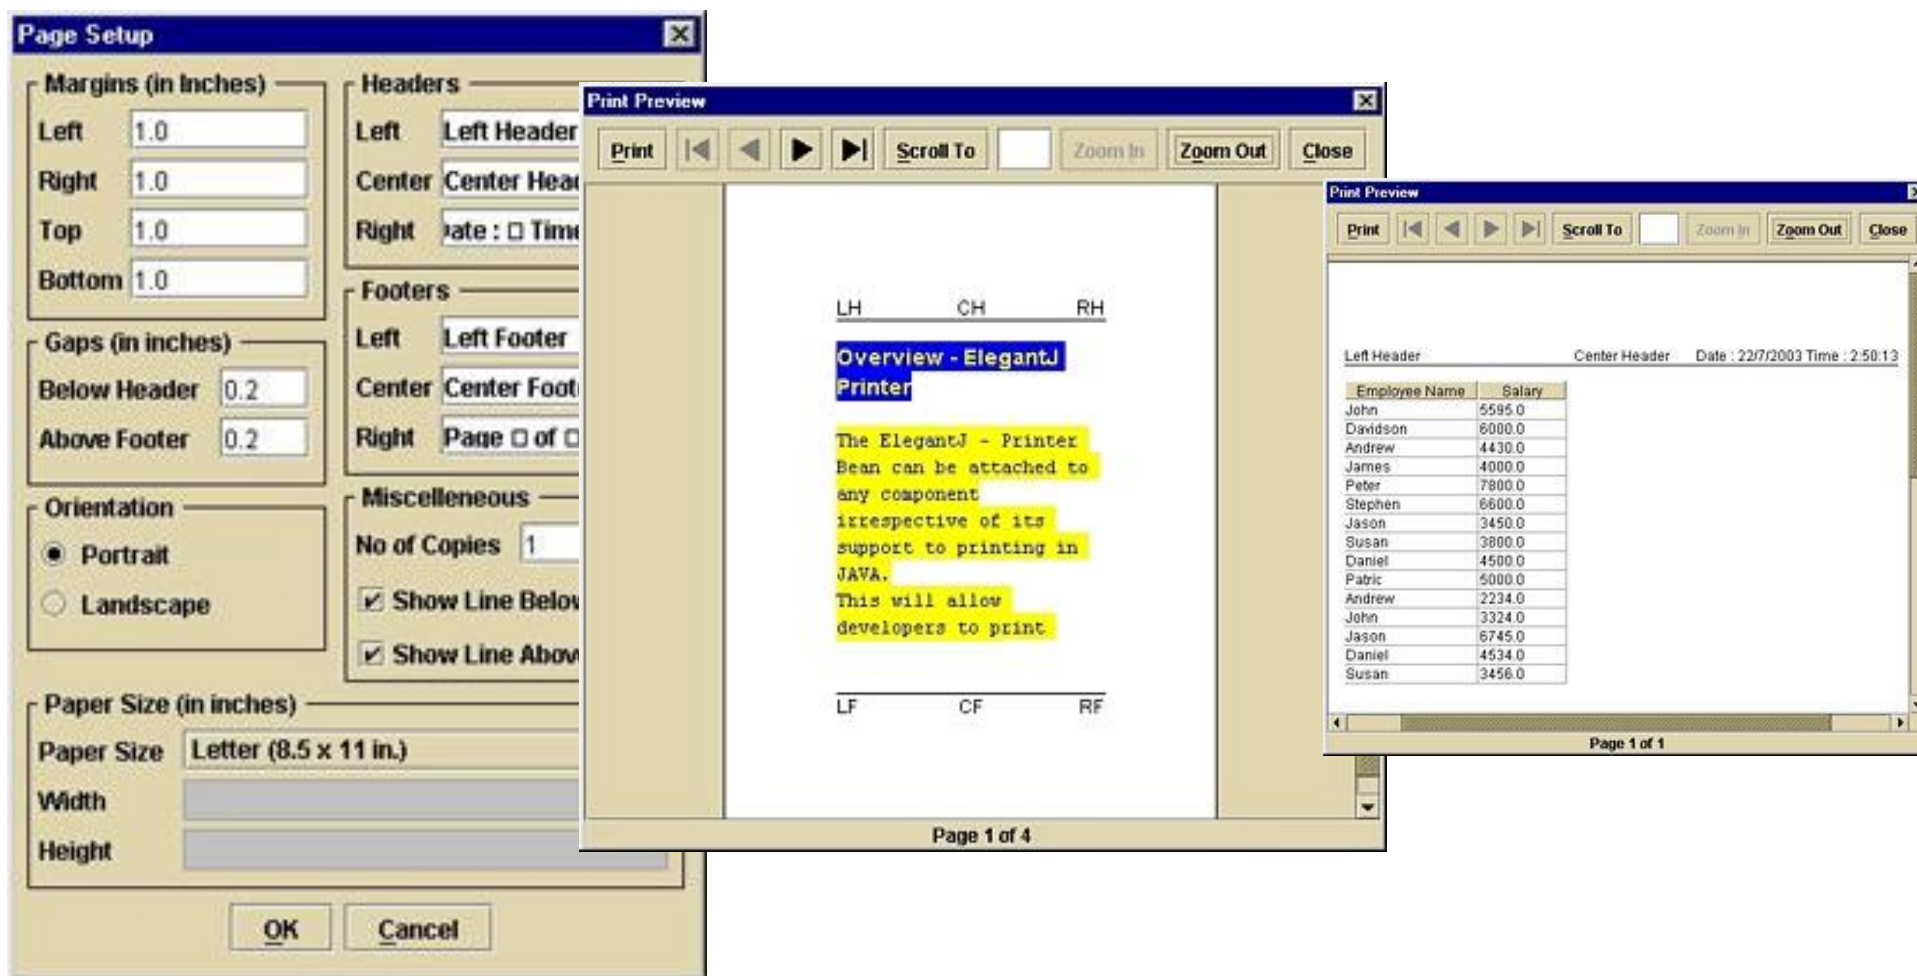

- Support for impact printers and non-impact printers
- Provide web-printing ability to your users
- Printing with scaling as well as wrapping
- Prints data directly on printer port for background printing of PRN file or files of other printable types
- Controllable spool size for efficiency in bulk printing
- Page setup and Page preview dialog box to give edge to your application's printing capabilities

Operational FUNCTIONALITIES

- Highly Portable. ElegantJ Printer Bean can be attached to any component irrespective of that component's support to printing in Java™.
- Provides special implementation for Java™ components - TextArea, JTextArea, JTextPane, JTable.
- Support for Scaling as well as Wrapping.
- Fast text printing support on impact printers.
- ElegantJ Printer bean provides methods for background printing and to print on specific printer port, which accepts data from PRN file, bytes array and other input streams.
- Controllable spool size to take care of bulk printing

Print and Page Setup FEATURES

- Supports all major page sizes including custom page size with landscape and portrait page orientation.
- Print a specific page or set of pages at a time.
- Customizable margins (top, bottom, left and right)
- Header and footer – set contents for left, center and right part. Also supports variable information like current date, current time, and page number.
- Ready to use Page Setup and Preview screens.

We support YOU, so you support YOUR users

Use our pre-prepared code in your application to speed up your development process. We provide FREE pre-purchase technical support to ensure successful evaluation. We provide total assistance from installing them, importing in all major IDEs and mapping a feature with your requirements. What you have to do is **just** mail us. We will help you find out if our Beans have a feature that you need. We also provide comprehensive technical documentation so that you can have answers for all your queries on your fingertip.

Download ElegantJBeans

Download free evaluation copy of any of our products from our web site www.elegantjbeans.com. Downloaded files contain detailed technical and user documentation, which will guide you through the process of installation, evaluation and purchase.

Other Java™ SOLUTIONS from Us

ElegantJ Data Table

Ready to use Table component that has all you wished to have. Also includes data access components

ElegantJ Tables

Ready to use Table component that has all you wished to have

ElegantJ Charts

Visualize THE Information Power
