© Elegant MicroWeb Technologies Pvt. Ltd.

# OVERVIEW

ElegantJBeans is a collection of JavaBeans™ Components developed for Java professionals. Development platform is not a constraint for ElegantJBeans. You can use ElegantJBeans component with J2SE, J2EE, JAVA applications and JAVA applets. ElegantJBeans can be imported in all major IDEs - to use it visually as well as through coding.

## Ready to use Table component that has all you wished to have

Be it a 4 row by 10 column table or a table to represent a database in tabular form, or a spreadsheet solution, you can rely on ElegantJ Tables Bean. From **AWT Table and JFC Table**, select the one that suits your need. Both can **handle large volume of data**. A cell can be edited as a Textbox, Text Area, Checkbox, Combo box, a Button, an icon, Boolean, etc. Manage data with maximum flexibility using Bean's **formatting, editing, navigating and information handling features**. Ready to use **Search Panel**, feature of **sorting**, functions of **insert, add or delete a row as well as column**.

ElegantJ Table Bean offers total control over information management through table. In case you are looking for a table bean that can get you data access too, then check out [ElegantJ Data Aware Table](#) bean.

## Salient FEATURES

- Supports small table as well as large tables
- AWT and JFC components
- Insert, Delete or Change a row
- Control editing at row / column or table level
- Highly flexible and configurable
- Page setup and printing features
- Ready to use search panel, sort and right-click menu

## Setup, Navigation and Editing

- Customizable row and column attributes
- Wide range of selection attributes
- Resize from column header, row header or cell. Also size row or column on double-clicks
- Update table in Real-time.
- Delete or insert a row and add a row with Delete / Insert / Enter key strokes respectively
- Auto-scroll with mouse-drag

## Formatting and Appearance

- Formatting using text properties, tooltip text, Opaque, locale setting, background color, border properties, fonts, etc.
- Customization of row and column number is made possible
- Formatting for horizontal and vertical grid

## Table Functionalities

- Ready to use powerful yet flexible search panel for data search
- Functionality of sorting. This is available on mouse click on column header as well as on right-click menu

# We support YOU, so you support YOUR users

Use our pre-prepared code in your application to speed up your development process. We provide FREE pre-purchase technical support to ensure successful evaluation. We provide total assistance from installing them, importing in all major IDEs and mapping a feature with your requirements. What you have to do is **just** mail us. We will help you find out if our Beans have a feature that you need. We also provide comprehensive technical documentation so that you can have answers for all your queries on your fingertip.

## Download ElegantJBeans

Download free evaluation copy of any of our products from our web site [www.elegantjbeans.com](http://www.elegantjbeans.com). Downloaded files contain detailed technical and user documentation, which will guide you through the process of installation, evaluation and purchase.

## Other Java™ SOLUTIONS from Us

### **ElegantJ Data Table**

Ready to use Table component that has all you wished to have. Also includes data access components

### **ElegantJ Data Entry Masks**

Ready Made validation logic for accurate data entry

### **ElegantJ Charts**

Visualize THE Information Power  
For more information, visit us at [www.elegantjcharts.com](http://www.elegantjcharts.com)

### **ElegantJ Report Writer**

Simplifying Enterprise Reporting  
For more information, visit us at [www.elegantjreports.com](http://www.elegantjreports.com)

### **ElegantJ Data Tree**

Feature-rich tree for hierarchical representation of data. Also includes data access components

### **ElegantJ Tree**

Feature-rich tree for hierarchical representation of data

### **ElegantJ Indicator & Gauges**

When monitoring of data changes is very important  
For more information, visit us at [www.elegantjcharts.com](http://www.elegantjcharts.com)

### **ElegantJ BI**

Enterprise Business Intelligence and Reporting tool  
For more information, visit us at [www.elegantjbi.com](http://www.elegantjbi.com)

### **ElegantJ Printer**

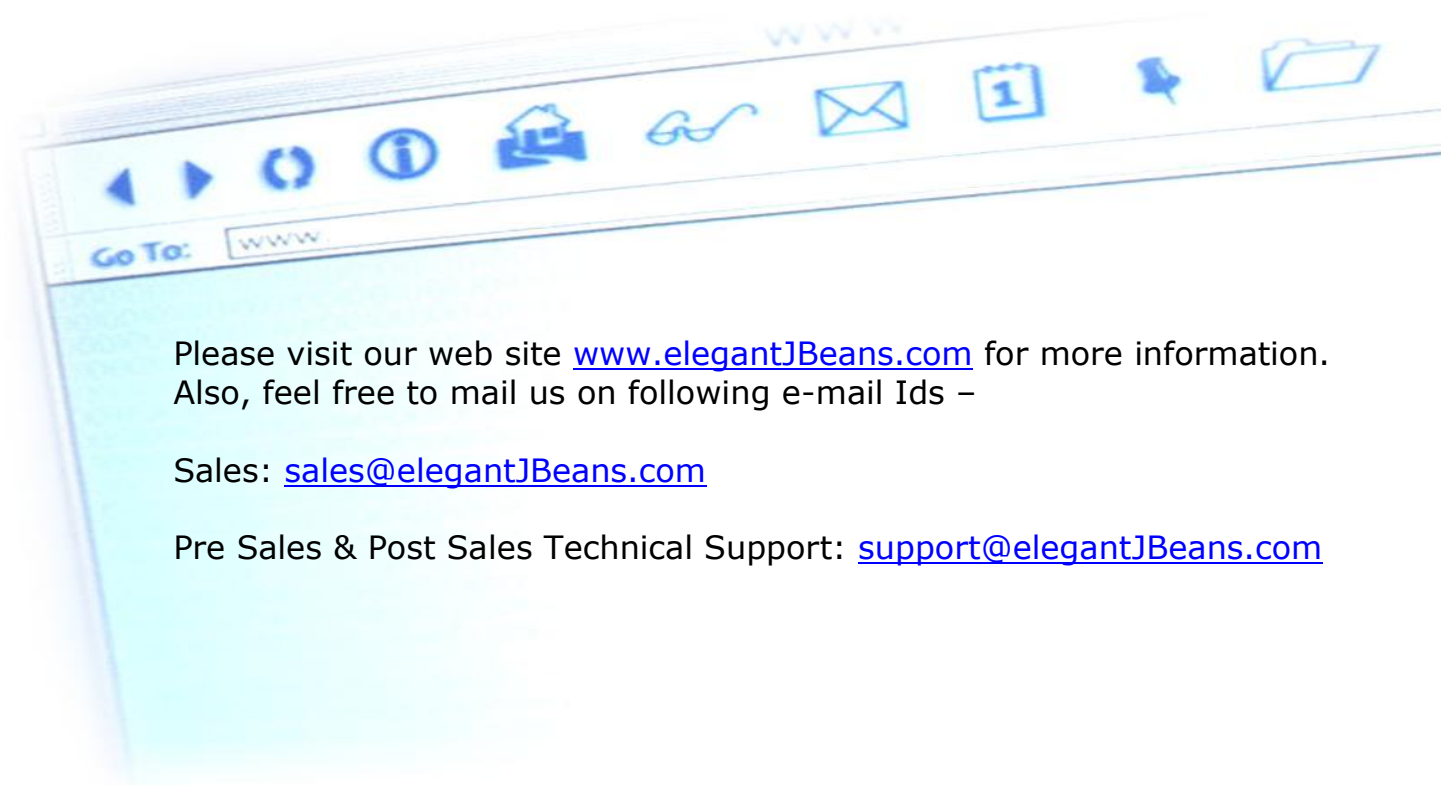

Dynamic Printing made simple, fast, easy and the most flexible

### **ElegantJ Network**

Your ready to use network protocol implementation for JAVA based solutions

### **ElegantJ PDF Library**

The Ultimate JAVA™ Library for PDF Publishing
